

# Artafex

## Retrofit *solutions*

Retrofitting existing fixtures with **Artafex downlights** is the quickest, most economical path to enhancing your space.

Transform your existing fixture with new modules and modern trims in 6", 5", 4" or 2" apertures.

**dmf**

## See Your Home in *a whole new light*

Enhance the architectural features of your home and create a warm, inviting living space using Artafex True Spectrum® technology.

Upgrading your lamp source with a retrofit solution retains the existing above-ceiling fixture and lighting layout while offering you improved color representation, advanced optics, 1% dimming, warm dim options, and compatibility with home automation systems.

## Retrofit Trims

Our simplest retrofit solution offers 6", 5", or 4" trims that along with a 4" module can be used with an existing housing.

## 6" to 4" Conversion Kit

Converts existing 6" recessed housings to a 4" fixture and a wide variety of 4" trims.

## 6" to 2" Conversion Kit

Our most dramatic transformation possible, converting an existing 6" housing to a modern 2" fixture.
